SUMMARY

A dedicated and detail-focused Computer Science graduate from Ateneo de Zamboanga University with a strong foundation in technical support, digital systems, and problem-solving in fast-paced environments. Known for being dependable, organized, and able to work effectively both independently and within a team. Always eager to learn new skills and take on challenges that support growth. Currently seeking for a role where I can grow, contribute to a team, and build a long-term career with a company that values growth and dedication.

PROFESSIONAL EXPERIENCE

Intern   **June 2023 – August 2023**
Department of Trade and Industry – Zamboanga City

- Supported administrative tasks, data encoding, and research for local trade and business development. Developed communication, teamwork, and time management skills in a fast-paced government setting.

ACADEMIC PROJECTS

Predictive Modeling of Used Motorcycle Prices Using Random Forest | Ateneo de Zamboanga University   **September 2024 – April 2025**

- Led an academic thesis project focused on developing a predictive pricing system for used motorcycles using the Random Forest algorithm.
- Prepared structured documentation across all project phases from research and data analysis to system development and deployment.
- Delivered academic papers and technical reports aligned with research standards and system accuracy.
